SUMMARY OF PROTESTS AND APPEALS AT THE 1989 SOLO II NATIONAL CHAMPIONSHIPS

The following summaries appear in class order, rather than in the order in which they were submitted. When two car numbers appear in the protests, two drivers were competing in the same car. Appeals are listed following the protest in question.

SS 80 (Thornton, Corvette) was PROTESTED at impound for improper wheel offset. Protest Committee findings: Wheel offset differs from stock by 11mm (7/16 inch) while the Solo II rules allow an offset variation from stock of no more than 1/4 inches. Competitor is disqualified.

SS 80 (Thornton) APPEALED the results of the Protest asking for re-measurement of the wheel and consideration of the lesser penalty. Finding of the Appeals Committee: The Committee re-measured the wheel and confirmed the measurements of the Protest Committee. Additional offset and the associated track increase is a performance advantage. The disqualification is confirmed.

AS 40 (Phillippe, Porsche 911) PROTESTED by AS 91 (Engle) for wheels wider than stock. Owners Manual for the year and model in question lists optional wheels of 7X15 front and 8X15 rear, which are the sizes fitted to the car. Protest was denied.

AS 69 (Havranek, Porsche 914-6) PROTESTED by AS 111 (Piera) for competing with the targa top in place during sunny weather. Protest Committee findings: Targa top was bolted in place, and thus is not "removeable". 3.3.C.14 does not apply. In addition this is a safety item, not a performance item, and is not protestable. Protest is denied.

AS 69 (Havranek, Porsche 914-6) PROTESTED by AS 111 (Piera) for non-stock rear springs and ride height. Protest Committee findings: Spring wire diameter and number of coils are the same as called for in the service manual. Ride height was found to be lower than standard dimension by 28mm (1.10 inches) on the right side and 22mm (.87 inches) on the left. However these fall within the tolerance allowed in the service manual. Protest is disallowed.

AS 69 (Havranek, Porsche 914-6) PROTESTED by AS 111 (Piera) for non-functional rev limiter. Findings of the Protest Committee: The ignition cuts off at 6500 rpm as specified in the workshop manual. Accuracy of the car tachometer was verified against an independent tachometer. Protest denied.

AS 69 (Havranek, Porsche 914-6) PROTESTED by AS 111 (Piera) for incorrect carburetor jetting and venturis. Protest Committee findings: Venturi size is standard specification. Air corrector jets are 180. Standard is listed as 170. Competitor is disqualified.

AS 69 (Havranek, Porsche 914-6) APPEALED the results of the Protest Committee. Provided two notes testifying that alternate air corrector jets were authorized to improve driveability and for altitude compensation. One was from Porsche Cars North America dated September 20, 1989, the other was a handwritten note (undated) from a Larry Moulton, on a specification sheet for the carburetor in question, with alternate settings marked by hand. Also argued that the parts price list includes air corrector jets of sizes other than 170, thus these must be legal. Also stated that the 911 Porsche of the same year used the same engine, on which air correctors of 180 were listed as legal, as demonstrated by an enclosed specification page. Findings of the Appeal Committee: The factory documentation of the air corrector jet for your car lists only 170 as correct. Parts in the price list may be for different cars and year models, and do not overrule workshop manual specification in any case. The documentation for a 911 Porsche is not acceptable for a 914-6. The Appeals Committee was also reluctant to accept notes based on recollection of events which occurred 19 years earlier, when they were not accompanied by any factory documentation from the time. In addition both notes state only that the modification was done or was authorized, but not that the factory directed that it must be done, which is the requirement of Rule 10.4. Furthermore both notes referred to altitude compensation, which is not an issue in Salina, Kansas. The appeal was denied.

AS 84 (Van Sicklen, Porsche 911) PROTESTED by AS 17 (Wilkinson) for changing the exhaust system beyond the allowances of Rule 11.10.E. Protest Committee findings: The exhaust system on the car in question had been backdated to a previous year model system. This is not allowed in the rules. The competitor is disqualified.

AS 84 (Van Sicklen) APPEALED the findings of the Protest Committee. He stated that his car was PROTESTED at the April 2nd Pro Solo in Shreveport, LA, but not disqualified. He further stated that issuance of a clarification in SportsCar was not a valid basis for the decision by the Protest Committee. Findings of the Appeal Committee: Rulings at a Pro Solo event are not relevant to Solo II. Although Pro Solo uses Solo II rules as a starting point, Pro Solo officials are free to interpret them as they see fit. Furthermore, the condition of the car on April 2nd can hardly be used as a basis for proving its condition on September 14th. Clarifications of rules published in SportsCar by the Solo Events Board are intended precisely as guidance for Protest Committees, as well as for individuals in preparation of their cars. The Protest Committee was entirely correct in using this clarification as a basis for their ruling. Appeal denied.

CS 4 and CS 104 (Lane and Reitmeir, Porsche 914-2.0) PROTESTED by CS 94 (Compton) for non-original front air dam. Protest Committee findings: Porsche documentation indicates that a front air dam was optional on the year model in question. The dimensions of the air dam installed were compared to the dimensions for the Porsche part listed, and were found to be essentially the same. Protest was denied.

CS 4 and CS 104 (Lane and Reitmeir, Porsche 914-2.0) PROTESTED by CS 135 (Metzger) for addition of steering rack spacers and additional bushings between the steering rack and car frame, which is not allowed in Stock Category. Findings of the Protest Committee: No spacers, washings, or bushings, other than as shown in factory documentation, were found on the steering rack or suspension. Protest was denied.

CS 22 and CS 122 (Regenold and McFarland, Porsche 914-2.0) PROTESTED by CS 131 (Garry). Protest contended that rear springs were larger than standard. Protest Committee findings: Protest Committee found that the wire diameter on the rear springs varied from .436 to .440 inches, while the stock wire diameter was listed as .378 inches. The springs are not standard. Both competitors were disqualified.

CS 122 (Regenold) APPEALED the findings of the Protest Committee. One page of documentation was submitted showing that three grades of springs were provided on the car in question. Also argued that the springs were not a performance advantage in that they did not change the ride height. Appeals Committee findings: The possible variation indicated across the three grades of springs was far less than the difference between the springs that were installed and stock springs. Grade range cannot account for the difference in spring sizes observed. Performance affect is not the issue. Whether the springs meet specification is. However, the Appeals Committee notes that this change in wire diameter would substantially increase the spring rate and doubts that performance would be unaffected. Appeal denied.

CS 35 (Metzger, Porsche 914-2.0) PROTESTED by CS 104 (Reitmeir) for substitution of front A-Arm bushings with those of a different material, a modification which is not authorized in Stock Category. Further noted that Rule 11 regarding alternate components does not apply since this rule specifies that replacement parts must be of the same type. Protest Committee findings: The A-arm bushings were not original, and were made of a different material. Furthermore, Porsche documentation states that the bushing is not a replacement item, and can only be replaced along with the suspension component to which it is bonded. Competitor was disqualified.

CS 94 (Compton, Porsche 914-2.0) PROTESTED by CS 131 (Garry) for non-stock second gear and final drive transmission ratios. Protest Committee findings: The committee found that the ratio of engine revolutions to wheel revolutions in second gear was correct per factory documentation. Protest denied.

FS 28 and FS 128 (Bay and Rohn, Chevrolet Camaro) were PROTESTED by impound for refusing to comply with impound procedures. At impound several cars in FS were tested for limited slip differentials, by jacking a rear wheel off the ground then testing for excessive resistance when turned by hand with the transmission in neutral. Based on this check Impound determined that further inspection of the differential on this car, including possible disassembly, was justified. Competitors refused to allow this inspection. Findings of the Protest Committee: The rules require competitors to follow impound procedures. Competitors were disqualified.

Timing and Scoring PROTESTED by CSP 13 (Westwood) for scoring a DNF on all three runs on one course. Also PROTESTED that DNF's were not promptly posted. Protest Committee findings: Based on witness statements, interviewing corner workers who recorded the DNF's, and observation of the course section in question, two timed runs were reinstated.

DSP 4 (Lewis, Triumph TR-6) PROTESTED by DSP 29 (DeBardeleben) for violation of 12.2.C because both front seats were replaced rather than only the driver's seat. Also PROTESTED removal of the windshield washer fluid tank, since removal is not specifically authorized. Protest Committee findings: While the singular word (seat) is used in 12.2.C, the wording could be equally well applied to the driver's seat or the passenger's seat individually. No specific number of seats is named in the rule. Each seat meets the requirement of 12.2.C that it be a fully padded and upholstered seat. Both seats are legal. Protest denied. The missing windshield washer fluid tank is in violation of the rules. The competitor was reprimanded, and instructed to replace the tank before competing again.

DSP 11 (Coder, Dodge Pickup truck) was PROTESTED at impound for removal of the tailgate. Protest Committee findings: Tailgate was removed and replaced with a fabric net. There is no provision in Street Prepared rules for removal of body panels, or a pickup tailgate in particular. Competitor is disqualified.

DSP 11 (Coder) APPEALED the decision of the Protest Committee. Competitor argued that he was told in a telephone call to SCCA National Office that if tech inspection at the National Championships did not challenge removal of the tailgate, then it was legal. Further stated that since the protest form was signed by Dick Martin, who was not a competitor in the class, and who was not listed as an event official, then the protest was invalid. Further stated that the net which replaced the original tailgate was an aerodynamic device permitted under Rule 12.2.E, and that it was also justified by 11.2.A. Also stated that other competitors had rule violations similar in concept, which were not penalized. Lastly stated that even if ruled illegal, removal of the tailgate and replacement with a net was not a performance advantage and therefore the penalty of disqualification should be reduced. Findings of the Appeal Committee: No affidavit or other documentation of the conversation with SCCA National Office was presented, and thus it cannot be considered. In any case such a conversation cannot change the rules. Solo II rules regarding tech inspection (3.3.C) contain no provision for ruling on legality. Nowhere do the Solo II rules state that passing tech is a certification of legality. The Committee verified with the Chief of Impound that Dick Martin was acting as an Impound Inspector, under the authority of the Chief of Impound and with her knowledge when he filed the protest. We find the protest to be in order. Rule 12.2.E allows aerodynamic devices. While the net might be interpreted as an aerodynamic device, there is no rule allowing removal of the tailgate. Street Prepared rules specifically state that you are not permitted to make an illegal modification in order to accommodate a legal one (12.1.B). Removal of the tailgate is not legal. Rule 11.2.A deals with comfort and convenience items "having no affect on performance and not materially reducing weight". Removal of the tailgate does not meet this test. The alleged violations by other competitors, which were said to be similar to removal of the tailgate, were not PROTESTED, and therefore were not ruled upon. Removal of the tailgate both reduces weight and aerodynamic drag. This clearly has the potential for performance improvement. As a result no reduction in penalty is appropriate. The disqualification stands.

DSP 14 (Rivera, Mazda RX2) was PROTESTED in impound. This car was prepared to Improved Touring rules. Protest stated that the car was in violation of IT rule IV.E.3.B regarding mounting of anti-sway bars. Findings of the Protest Committee: Although spacer blocks were added between the body and the front sway bar bushings, the original pickup points to the body were used, and the installation appears to meet this and all other requirements of the rule in question. Protest is disallowed.

DSP 29 (DeBardeleben, Mazda RX3) PROTESTED at impound for competing as an Improved Touring car, but without an official logbook. Protest Committee findings: Rule 12 states that "cars eligible to compete in and prepared to current National Improved Touring rules are permitted to compete in their respective street prepared classes". In order for a car to be eligible to compete in Improved Touring, it must have a logbook. Therefore this car is not eligible to compete. Protest was upheld. Car was disqualified.

DSP 29 (DeBardeleben, Mazda RX3) APPEALED the results of the Protest findings, arguing that the GCR rule cited in the protest allows cars without logbooks to compete if they are re-inspected at the event site. This option was not offered to the competitor in question. Furthermore "eligible to compete" in Rule 12 can also be read to mean all cars listed as eligible in the Improved Touring rules, rather than that each individual car must be logbooked. Appeals Committee findings: Appeals Committee agreed with the appellant and further notes that elsewhere in the Solo II rules when a logbook is required it is specifically mentioned (for example 13.1.X). Rule 12 does not specifically require logbooks. Appeal is accepted. The car was re-instated to its original finishing position.

Timing and Scoring PROTESTED by DSP 84 (Barnes) for scoring a DNF on his third run. Protest Committee findings: Protest Committee interviewed witnesses, corner workers, and observed the course from the position of the witnesses. The committee found that the witness viewing position was inconclusive, and corner worker records were clear. Protest denied.

CP 69 and CPL 69 (Zickuhr and Earle, Chevrolet Camaro) were PROTESTED in impound for unauthorized body panel modification. Specifically the hood, fenders, and front facia were replaced with a single fiberglass unit, although the hood section had been cut out and then re-attached by bolts to the fender sections. Findings of the Protest Committee: The hood is improperly attached using bolts instead of the allowed pins and straps. The Protest Committee also feels that the hinges on the nosepiece are illegal. However none of this results in the performance advantage in Solo II, since the change of material is permitted. The drivers are reprimanded and must correct the car before competing in another event.

Timing and Scoring was PROTESTED by DP 46 (Sample). Contention was that either the timing system or timing and scoring workers added 10 seconds to each of the second and third runs. Protest Committee findings: The Protest Committee inspected all timing records and logsheets, and could find no discrepancy. Even if the time was incorrect, the committee can see no objective way to determine what adjustment should be made, and thus finds no practical remedy. Protest was denied.

DP 46 (Sample) APPEALED the decision of the Protest Committee. Appeals Committee findings were the same as those of the Protest Committee. Appeal denied.

STATE OF KANSAS

SENATE RESOLUTION No. 1873

A RESOLUTION honoring the Sports Car Club of America

WHEREAS, For the past eight years, Sports Car Club of America members have come to Kansas to participate in the Solo II Nationals. For many of those years competitors would announce their intent to go to "Nationals". Most recently, however, the announcement that is heard is "I'm going to Salina!"; and

WHEREAS, The Sports Car Club of America was founded in 1944 by amateur motorsports enthusiasts, and today has over 51,000 members. This non-profit organization is thriving as never before and now sanctions more than 2,000 amateur and professional motorsports events each year; and

WHEREAS, The Sports Car Club of America Solo II is a low-cost, negligible-risk, high-excitement activity that pours close to $4,000,000 into the Kansas and Salina economy in just ten short days. It is a family sport with both men's and women's classes; and

WHEREAS, Salina, Kansas, with its geographic location, hotel and motel facilities, congenial and cooperative population, and active Chamber of Commerce, is the home of the Sports Car Club of America's Solo II National Championships. The Club and the Solo II membership look foward to this year's championships September 11 through 17: Now, therefore,

Be it resolved by the Senate of the State of Kansas: That we honor the Sports Car Club of America; and

Be it further resolved: That the Secretary of the Senate be directed to send four enrolled copies of this resolution to Dick Bonheim, Nick Craw, Costa Dunias, Sports Car Club of America, Inc. 9033 East Easter Place, P.O. Box 3278, Englewood, Colorado 80112-2105, and one copy to the Salina Chamber of Commerce, 120 West Ash Street, Salina, Kansas 67401.

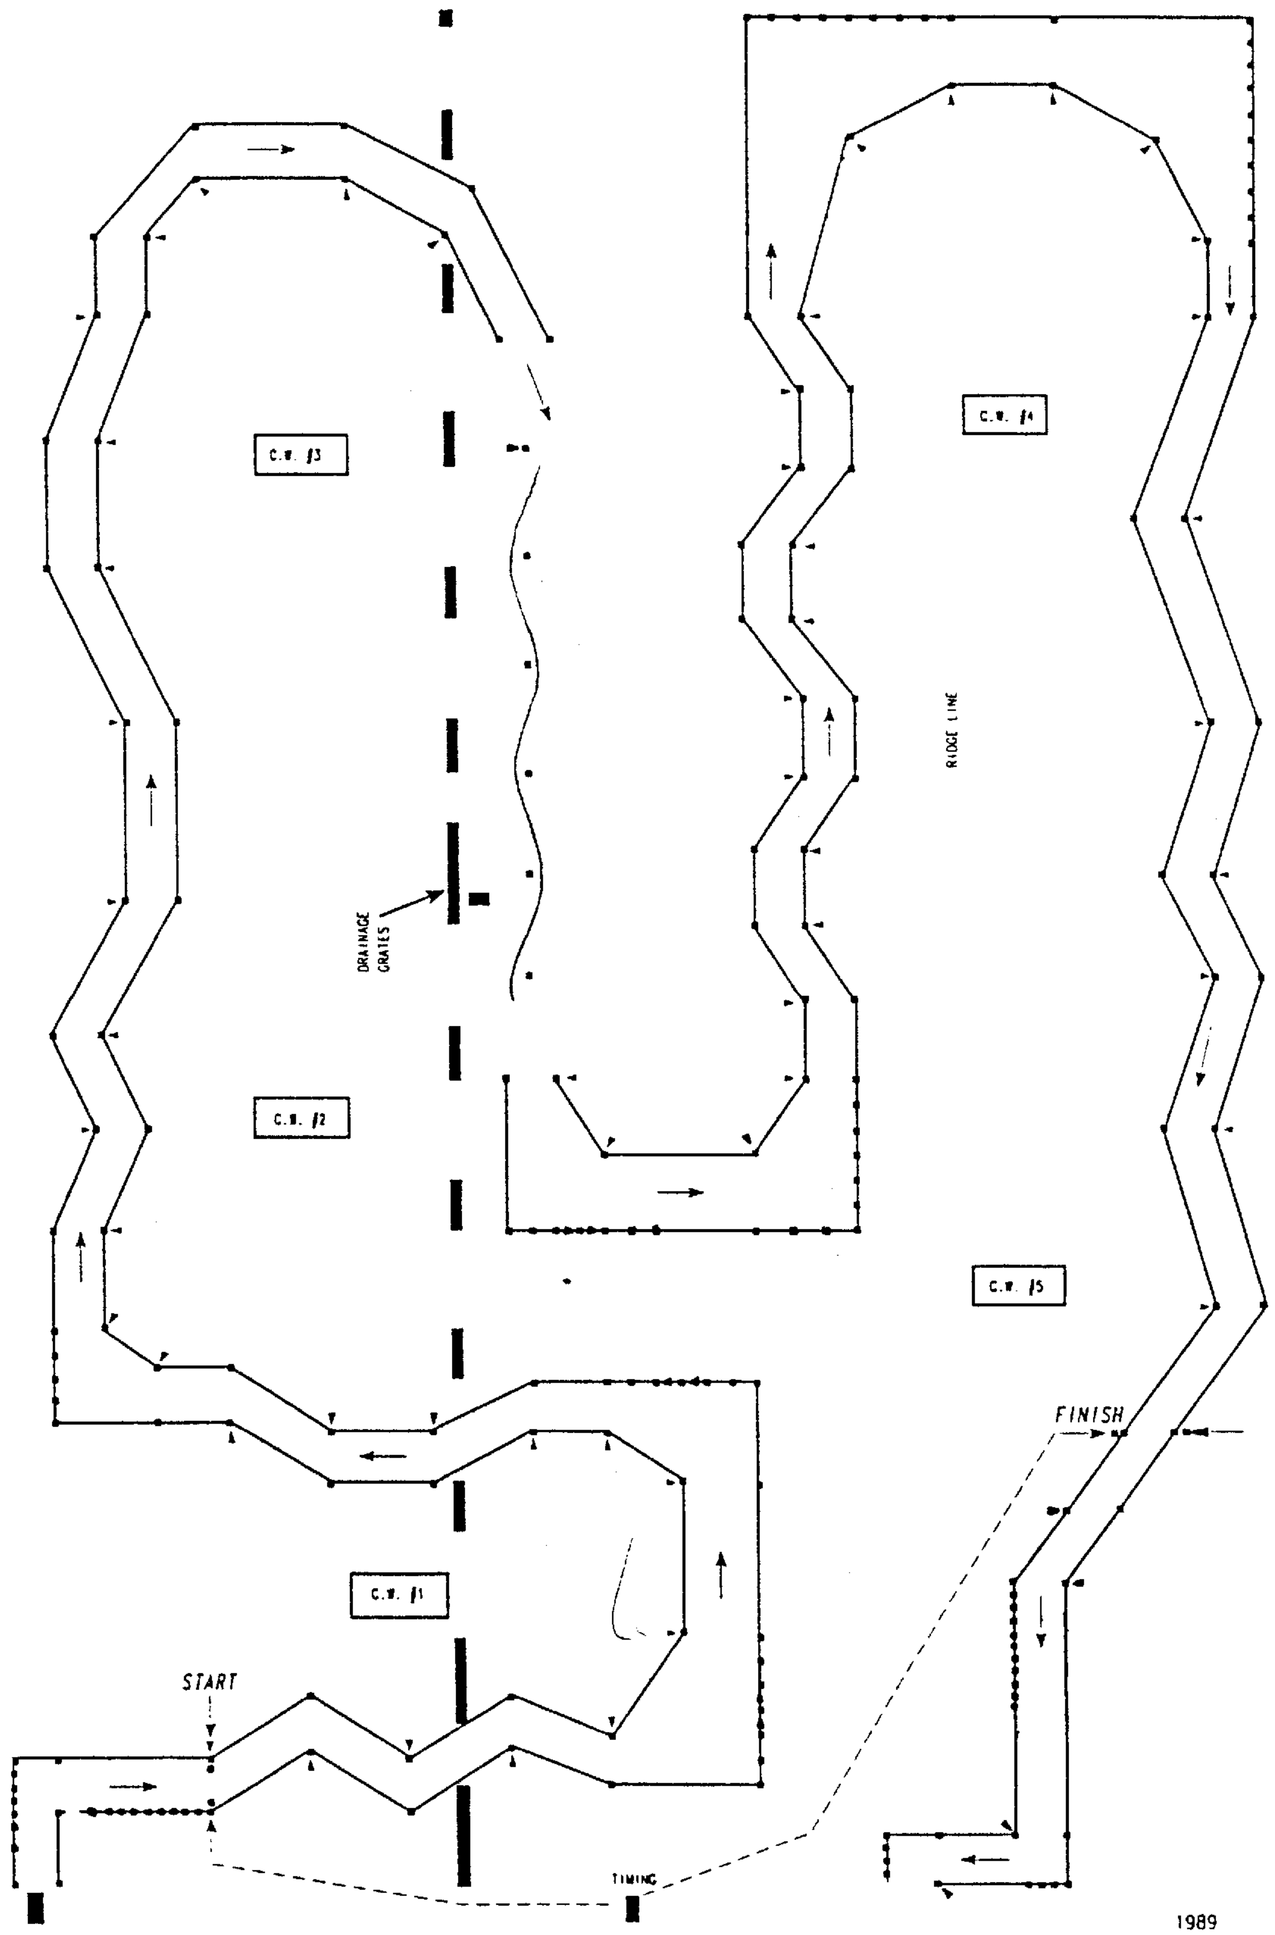

Senate Resolution No. 1873 was sponsored by Senator Ben E. Vidricksen.

I hereby certify that the above RESOLUTION originated in the SENATE, and was adopted by that body

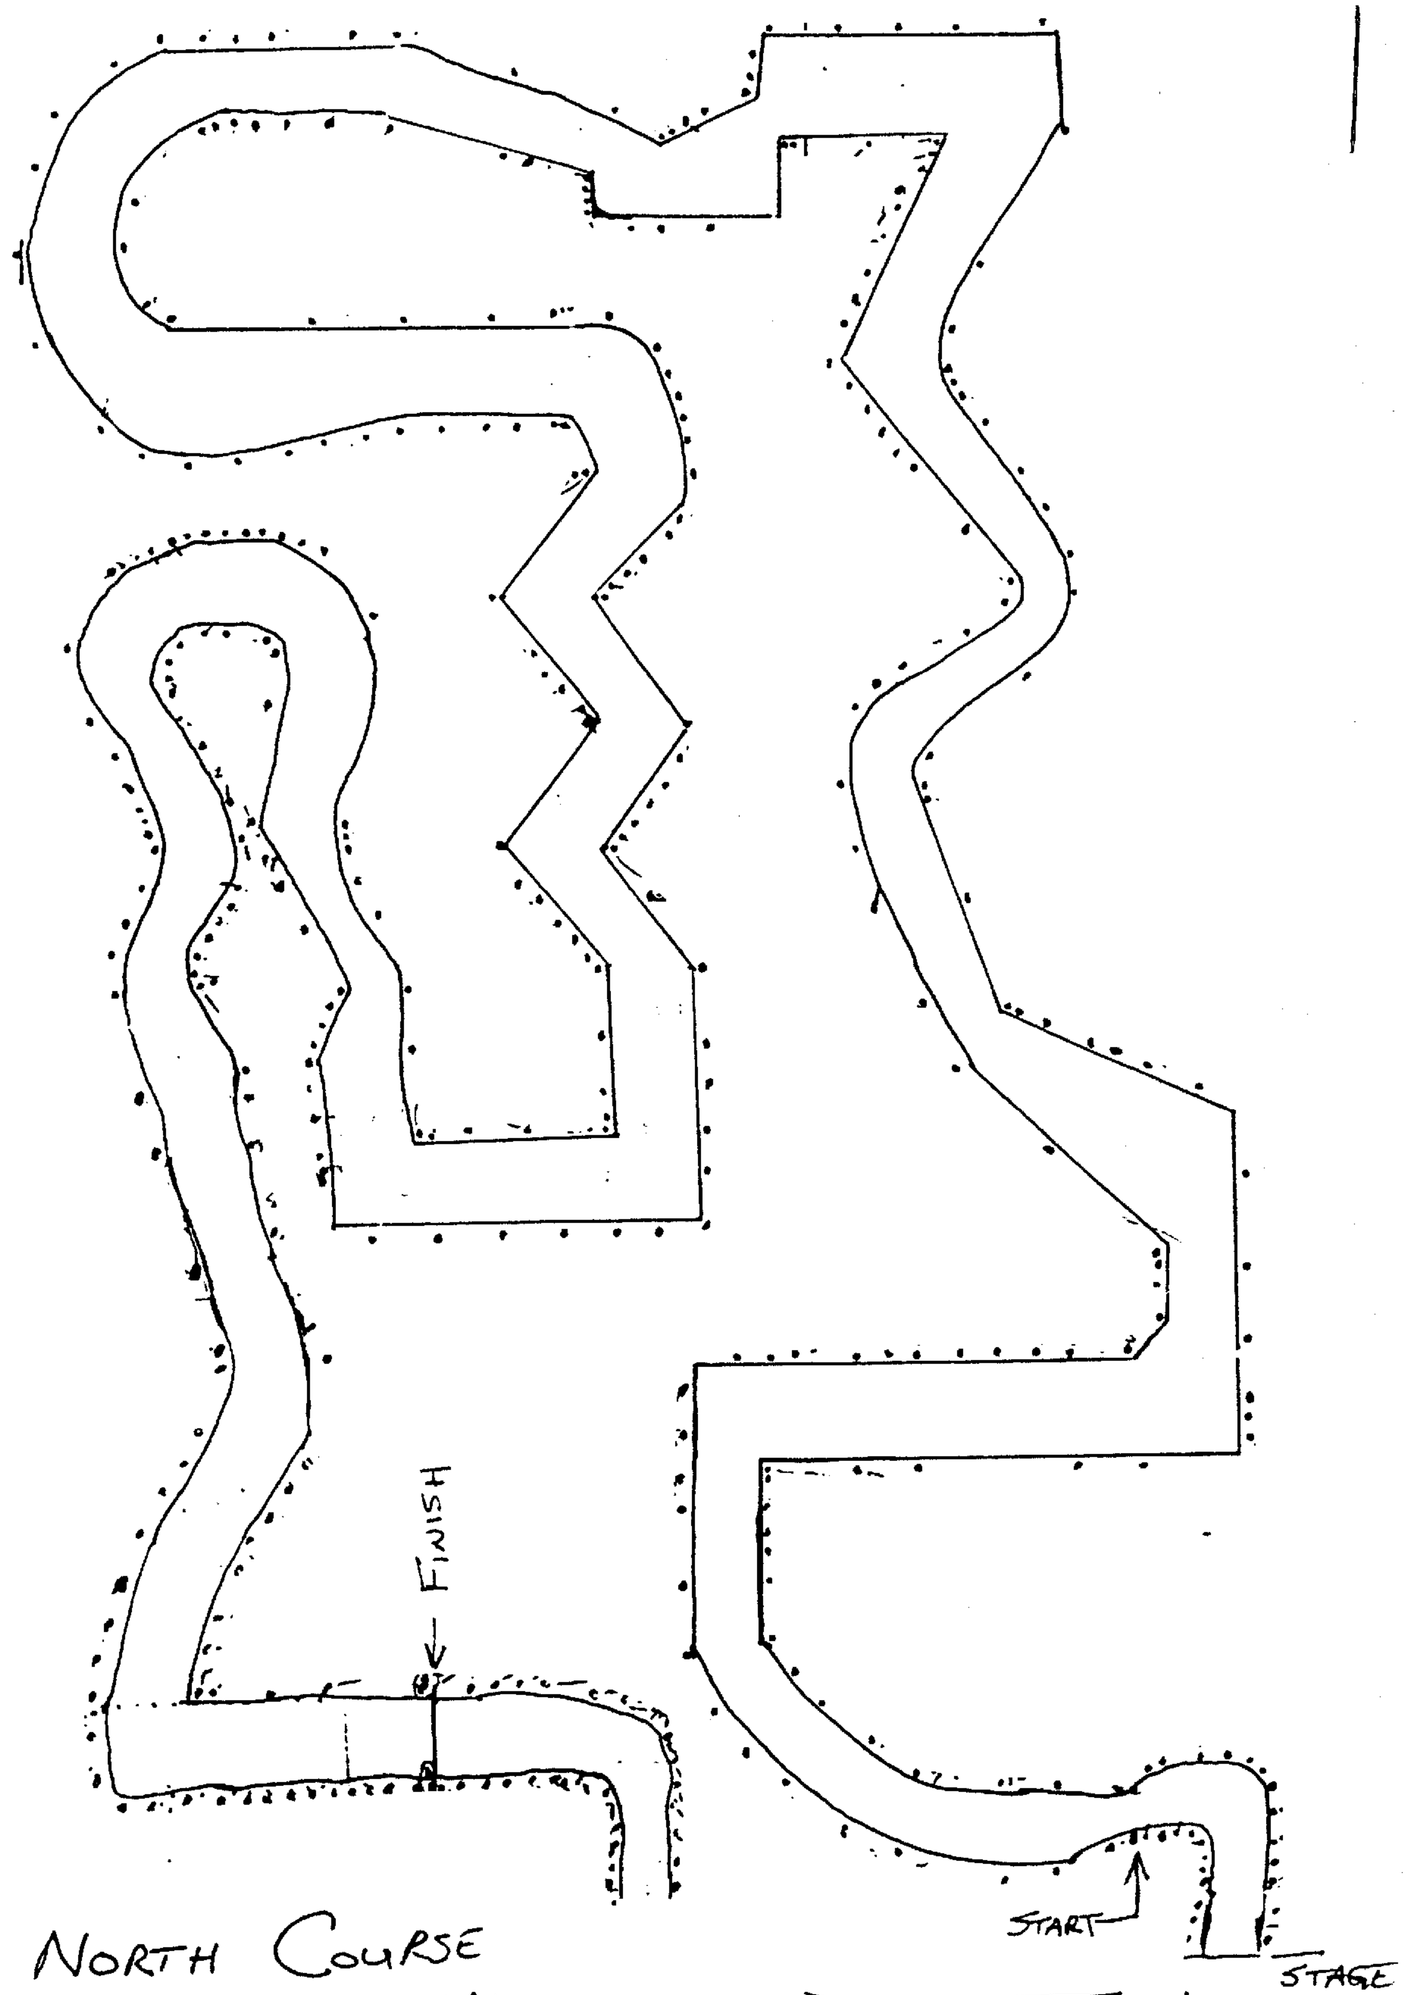

April 29, 1989

Paul E. Burke, Jr.
President of the Senate.

Lee Kennedy
Secretary of the Senate.
