OFFICIAL RESULTS

"GEEZ is the best thing to come along to potentially improve lap times since the A001R."

--Roger Johnson
15-time Solo II and Pro-Solo National Champion

It's trite but true. If you want to go faster, begin by working on that loose nut behind the wheel. Nothing you do to your car will give you the kind of results that you get from driver improvement. *But where to start?* The problem is figuring out that one most critical place you can improve, and working on that one thing until you crush it. Then looking for the next area to improve. And after you've mastered your worst habits, you can start working on the niggling details. *Like where to put all those trophies.*

GEEZ provides the tools to let you wrap your brain around the problem. At $395, hardware and software included, it's less than a set of tires, less than shocks, less than about any of the critical stuff you do to improve your car.

And isn't it worth a little more to improve...you?

Race tires for your mind!

SCCA®

September 1999

Dear National Solo II Participants,

We would like to take this opportunity to thank you for competing in this year's Tire Rack SCCA Solo II National Championship. With 928 entrants we were close to breaking the record of 930 from the 25th Anniversary year.

This year was again a memorable one and what made it especially memorable was the sense of cooperation and attitude from the entrants. Without everyone of you pitching in, the event would not have been such a success.

However, there are some competitors who deserve an extra thank you for all their hard work during the event, specifically Paula and Nick Leverone, Co-Chairman, as well as all the Chiefs for taking full responsibility for their duties. Please let these people know how much you appreciate their contribution to our sport as you see them over the coming months.

Some of the people that may have been unknown and unseen, but were very instrumental in making this event happen are the people of Topeka, Col. Loren Pearson of the Kansas Region, David Stremming from the Metropolitan Topeka Airport Authority, Wayne Bennett from the Topeka Convention and Visitors Bureau, and the City of Topeka.

Last, but not least, are the national event sponsors, beginning with Matt Edmonds of the Tire Rack. Without their support this event would not have been economically possible.

Please take a few moments over the coming weeks and send along an expression of your gratitude to all the folks above for all their contributions to this event and our sport.

We hope you enjoyed not only this event, but all the National events in 1999. We look forward to seeing you at the National Solo 2000 events, on the "Road to Topeka – 1000 in 2000".

Sincerely,

Tasha Goodale

In addition to your enthusiasm, and the contributions of time and knowledge from the Chiefs and Workers, the companies listed below lent us their time and equipment, and invested substantial funds to help us make the 27th running of this year's national championship a terrific success.
Please take a few moments to write a thank-you note to the Tire Rack, and the associate and contingency sponsors who faithfully support your sport.

THE TIRE RACK® Solo II SCCA National Championship

Even a beginner knows it's best to race on Kumho Tires.

Congratulations to Lori Robertson for her 1st win in her rookie year. Lori knew that Kumho Tires would help give her a good start and especially the edge she needed to take the number one spot.

Kumho would like to congratulate these experienced drivers who know not to waste their time with those "other" tires.

SCCA Solo II winners:

Lori Robertson	SSL	Debbie Fessler	ESL
Paul Kozlak	AS	Pat Salerno	FS
Gary Thomason	BS	Ren Marinus	ASP
Katie Elder	BSL	LiNay White	BSPL
Brian Priebe	CS	Eileen Lindberg	ESPL

IMPREZA 2.5RS

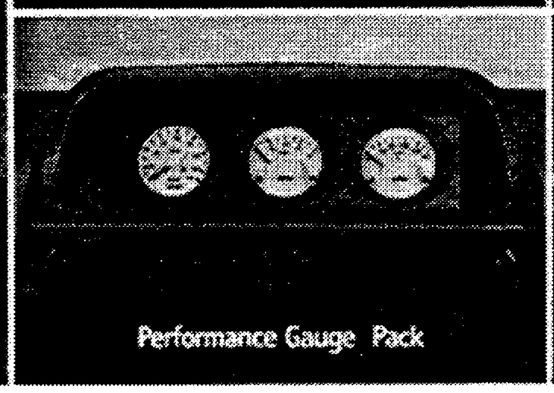

Subaru Performance Parts

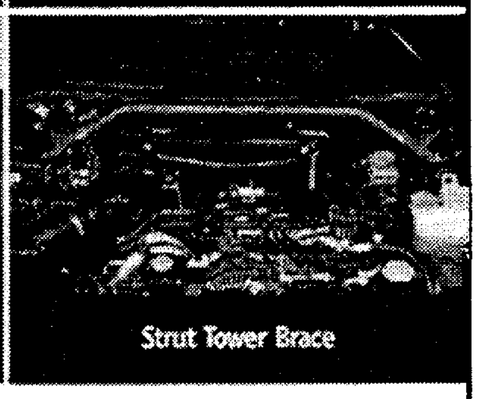

Introducing a select group of performance parts to increase your driving pleasure.

Carbon Fiber Center Panel Trim Kit

Carbon Fiber Shift Knob/Brake Handle

Performance Muffler

Performance Gauge Pack

Strut Tower Brace

Just when you thought you couldn't love your Subaru Impreza 2.5 RS more—along comes a new line of Performance Parts to make your vehicle even more fun to own. Engineered specifically to enhance the performance, endurance and, in some cases, the look of your Subaru Impreza 2.5 RS, these Performance Parts allow you to customize, without asking you to compromise the quality and integrity of your vehicle.

SUBARU Genuine Parts

ADDITIONAL PERFORMANCE PARTS: ▸ LEATHER INTERIOR PACKAGE ▸ FRONT END COVERS ▸ REAR DIFFERENTIAL PROTECTOR ▸ CARPETED FLOOR COVERS ▸ SHORT THROW SHIFTER ▸ CARBON FIBER STRUT TOWER BRACE

1999 TIRE RACK SCCA SOLO II NATIONAL CHAMPIONSHIP PROTEST/APPEAL SUMMARIES

FS 40/140 (Mark Alft, Brian Goodner) protested by 37, 137, 38, 138, 73, 65 (Doug Wille, Wally Strzelec, Chris Lindberg, Dean Sapp, Kevin Youngers, David Cole, Alex Tziortzis, Casey Weiss, and Mark Zwieg) for violation of 13.10.K - Non-standard limited slip, out of spec.
Finding of Protest Committee

Differential break-away torque tested and found to be within shop manual specifications. Bond of $55 established for removal of differential cover and replacement of differential lubricant and gaskets. Cover removed, differential visually inspected by protest committee, protestee, and with protestee's agreement inspection performed by all protestors. All parties agreed the differential was legal. Protest disallowed. Protest fee retained.

BS 97 (Katie Kelly) protested by BS 72 (Kevin McCormick) for violation of 13.5.F, 13.9.C and 13.8 (1) Spring perch heights (spring location) is too low – front and rear, (2) Ignition timing out of specifications and (3) Coil spring free length out of manufacturer's spec.
Findings of Protest Committee

Bond initially established at $200 to cover removal of a front shock, rear shock, front spring and rear spring. Upon review of shop manual Protest Committee determined that checking Ignition timing required diagnostic equipment unavailable to the protest committee. Dealer contacted, cost to check ignition timing is approximately $70. Dealer would not be able to perform timing check until Friday. Protestor informed of cost to check timing. Protestor later withdraws request for timing verification.

Protestor provided a front and rear OEM shock for comparison purposes. It was explained to the protestee that they didn't have to accept samples provided by the protestor. Protestee accepted protestor provided samples with the right to require new, unopened samples at a later time.

Spring perch heights measured with shocks still mounted on the car. Compared against samples provided by the protestor. Rear spring perch found to be less than 1/10 of an inch lower than sample provided by protestor. Front spring perch found to be less than 1/10 of an inch higher than sample provided by protestor. The Protestor was given option of going ahead with tear down or stopping. Protestor requested that the rear shock be removed and measured before deciding on front shock and spring free lengths.

Rear shock removed, measured multiple times with similar results each time. Sample rear shock measured multiple times with similar results from each measurement. Given that there are rubber bushings in both the protested shock and the sample shock, the unknown usage history of the sample shock, the canting of the mounting piece in the rubber bushing and manufacturing tolerances, the protest committee determined the rear shock to be legal. The measurement method was reviewed and accepted by the protestor and protestee. This finding does not constitute a blanket endorsement of other Koni struts/shocks using the same "groove" in this application; rather to allow for varying manufacturing tolerances and changes, each competitor must assure exacting adherence to specifications in each case. Bond of $50 for removal of rear shock and spring forfeited.

The shop manual for the protested car (1996 Miata) does not contain specifications for spring free length or measuring method. It was explained to the protestor, that without a specification in the shop manual, per 13 Stock Category, the burden of proof reverted to the protestor. It was explained to the protestor that he would need to provide written specifications from Mazda or springs would have to be purchased by SCCA at his expense for comparison purposes. Protest of spring free length withdrawn. Protest disallowed. Protest fee retained.

AM 8/108 (Freeman/Woods) protested by AM 64 (Robert Barone) for 16.5.2 - vehicle must meet FSAE specs including restrictor plate being in place or in specified location.
Findings of Protest Committee:

FSAE rules dictate an eighteen millimeter restrictor plate. The restictor must be between the throttle and the turbo. The opening in the restrictor was found to be less than eighteen millimeters. The restrictor was in the correct location. Protest disallowed. Protest fee retained.

ASP 24 (Rex Carle) protested by ASP 81 (Doug Hebenthal) for violation of 14.1.B – holes created in body to facilitate suspension modifications. Specifically, the front inner fender wells have been modified to allow the top of the shock absorbers to protrude through the opening.
Findings of the Protest Committee:

Protest withdrawn. Protest fee returned.

ASP 31/132 (Wilkowski) protested by ASP 81 (Doug Hebenthal) for violation of 14.1.B – holes created in body to facilitate suspension modifications. Specifically, the front inner fender wells have been modified to allow the top of the shock absorbers to protrude through the opening.
Findings of the Protest Committee:

Body holes were the result of poor maintenance, body flexing and rubber bushing in shocks. The result of which was the top of the shock contacting the inner fender well and eventually punching a hole through the fiberglass. Holes were not the result of the protestee modifying the front inner fender wells. Protestee was reprimanded for poor maintenance and required to fix holes in the inner fender before the next event. Protest upheld. Protest fee returned to protestor.

ASP 66 (Mark Huffman) protested by ASP 81 (Doug Hebenthal) for violation of 14.1.B – holes created in body to facilitate suspension modifications. Specifically, the front inner fender wells have been modified to allow the top of the shock absorbers to protrude through the opening.
Findings of the Protest Committee:

Body hole were the result of poor maintenance, body flexing and rubber bushing in shocks. The result of which was the top of the shock contacting the inner fender well and eventually punching a hole through the fiberglass. Holes were not the result of the protestee modifying the front inner fender wells. Protestee was reprimanded for poor maintenance and required to fix holes in the inner fender before the next event. Protest upheld. Protest fee returned to protestor.

BM 31 & 131 (Darren Madams, Mike Lella) protested by BM 16 & 28 (Colan Arnold, Bruce Domeck) for violation of Appendix A, Modified Class B Specifications – formula cars legal under previous year GCR. Specifically GCR Formula Car Specs for Formula Atlantic require skirts on sidepods to be no lower than 1CM below the bottom of the tub.

Findings of the Protest Committee:

Protest was filed by a member of the Protest Committee, an alternate Protest Committee was formed by the Chief Steward.

Findings of the Alternate Protest Committee:

Skirts on sidepods measured by Alternate Protest Committee, skirt were found to be below the bottom of the tub, with measurements of 2.5CM at the front of the car, and 0.9CM at the rear of the car. The sidepod skirts were not in compliance with the Formula Car specifications. Penalty of 2 seconds per run imposed upon each driver. Drivers may compete on second day if rules violation is corrected. Protest fee returned to protestors.

CSP 67 (Heath McMillen) protested by CSP 6 (John Hayes) for violation of 14.1.B & C – change of gearing in transmission to non-stock.

Findings of the Protest Committee:

Protest Committee declined to hear the protest since it was filed after the start of the third run on the second day of competition. Protest fee returned.

AP 22 & 122 (Leeds Gulick, Greg Fordahl) protested by AP 113 (Peter Fehn) for violation of 15.11 – GTCS cars allowed to compete in respective Solo II class; 99 RSR 3.8 car not classed – no min. Solo II weight and wheels established.

Findings of Protest Committee:

Protestee provided letter from Solo Events Board dated September 2, 1999 stating the car is classed in AP under the existing 911 listing with a minimum base weight of 2400 pounds plus a 10% penalty for modifications in excess of Solo II rules, but within the GT rules as specified under section 15.11. Protest disallowed. Protest fee returned. Protestor filed an Intent to Appeal. Appeal fee of $50 collected.

Findings of Appeals Committee:

The SEB determined that the classification of the car was not directly an SEB action, but rather one of the Club Racing Competition Board when that body issued the June Tech Bulletin adding the car to class GT1 with accompanying specifications. The request for classification received from Greg Fordahl had thus only required that the SEB determine the necessary minimum weight for the car as per Solo II Rules Section 15.11.A. The intent of that section is not to exclude particular GTCS-legal cars based on variations of specifications, but rather to provide for their inclusion, with weight penalties, in appropriate Solo II Prepared classes so long as they meet the required GT rules and have been formally listed in a Club Racing GT class, as this car had been. Hence the SEB did not agree with the appellant that a separate Appeals Committee needed to be appointed.

The Appeals Committee determined that the Appeal was in error in the following areas:

(a) objecting to a weight of 2400 lbs, since the assigned minimum weight for the car was actually 2640 lbs (2400 lbs plus 10%),

(b) contending that the car was placed in the wrong class. The "930 Turbo Carrera" listing in BP clearly does not apply to the subject car,

(c) contending that the SEB improperly classed the car. This car was declared a valid GT1 car by the Competition Board as of its Tech Bulletin in the June Fastrack. Per the provisions of Section 15.11.A, GTCS-legal cars which are beyond the Solo II Rules allowances (including the specifications within Appendix A) may compete in Prepared at 10% over the Solo II minimum weight. The SEB determined that the applicable Solo II minimum weight

was 2400 lbs., thus this car was required to compete at minimum of 2640 lbs. All other applicable specifications, including those for wheels, come from the GTCS listing. The Appeals Committee upheld the decision of the Protest Committee in this matter. Appeal fee returned. (Tunnell and Ankeny abstaining)

AP 22 & 122 (Leeds Gulick, Greg Fordahl) protested by AP 13 (David Butler) for violation of 15. – the rules shall discourage the use of high technology and high cost equipment. In some cases this is accomplished by an out right ban on the equipment.

Findings of Protest Committee:

Protestee provided letter from Solo Events Board dated September 2, 1999 stating the car is classed in AP under the existing 911 listing with a minimum base weight of 2400 pounds plus a 10% penalty for modifications in excess of Solo II rules, but within the GT rules as specified under section 15.11. While the car under protest may or may not violate the spirit of the sentence quoted from Section 15 of the Solo II rules, given the fact the SEB has ruled the car is classed under the provisions of Section 15.11, the car is eligible for competition. Protest disallowed. Protest fee returned. Protestor filed an Intent to Appeal. Appeal fee of $50 collected.

Findings of Appeals Committee:

The Appeals Committee determined that the classification of the car was provided for by Club Racing's GT1 listing published in the June Fastrack (Tech Bulletin #99-06), and the allowance contained in the Solo II Rules, section 15.11.A, for GTCS cars to compete in Solo II prepared classes with appropriate weight penalties. When a car comes into a Prepared class under the Club Racing GTCS, its required specifications, except for weight, come from the GT rules rather than the Solo II Rules. Appeal fee returned. (Tunnell and Ankeny abstaining)

AP 40 & 140 (Mark Shuler, Craig Nagler) protested by AP 96 (Robert Huffman) for violation of 15.2.B – Belly pan forward of the firewall.

Findings of the Protest Committee:

Protest Committee examined the car and found a non-stock horizontal aluminum honeycomb plate covering the bottom of the front spoiler and extending rearward past the front of the front wheel opening to the front cross member. Protestee (Nagler) during the protest hearing explained the horizontal aluminum plate was not a bellypan. The plate in question was support for the front spoiler, reinforcement for the frontal bodywork and shrouding for the radiator. Protestee also indicated that a stock BMW has a similar plate made of plastic. In reaching its decision the Protest Committee determined the relevant Solo II Prepared Category rules were 15.1, 15.1.A, 15.2,15.2.B, 15.2.M, 15.2.Q and 15.10.Q.3.

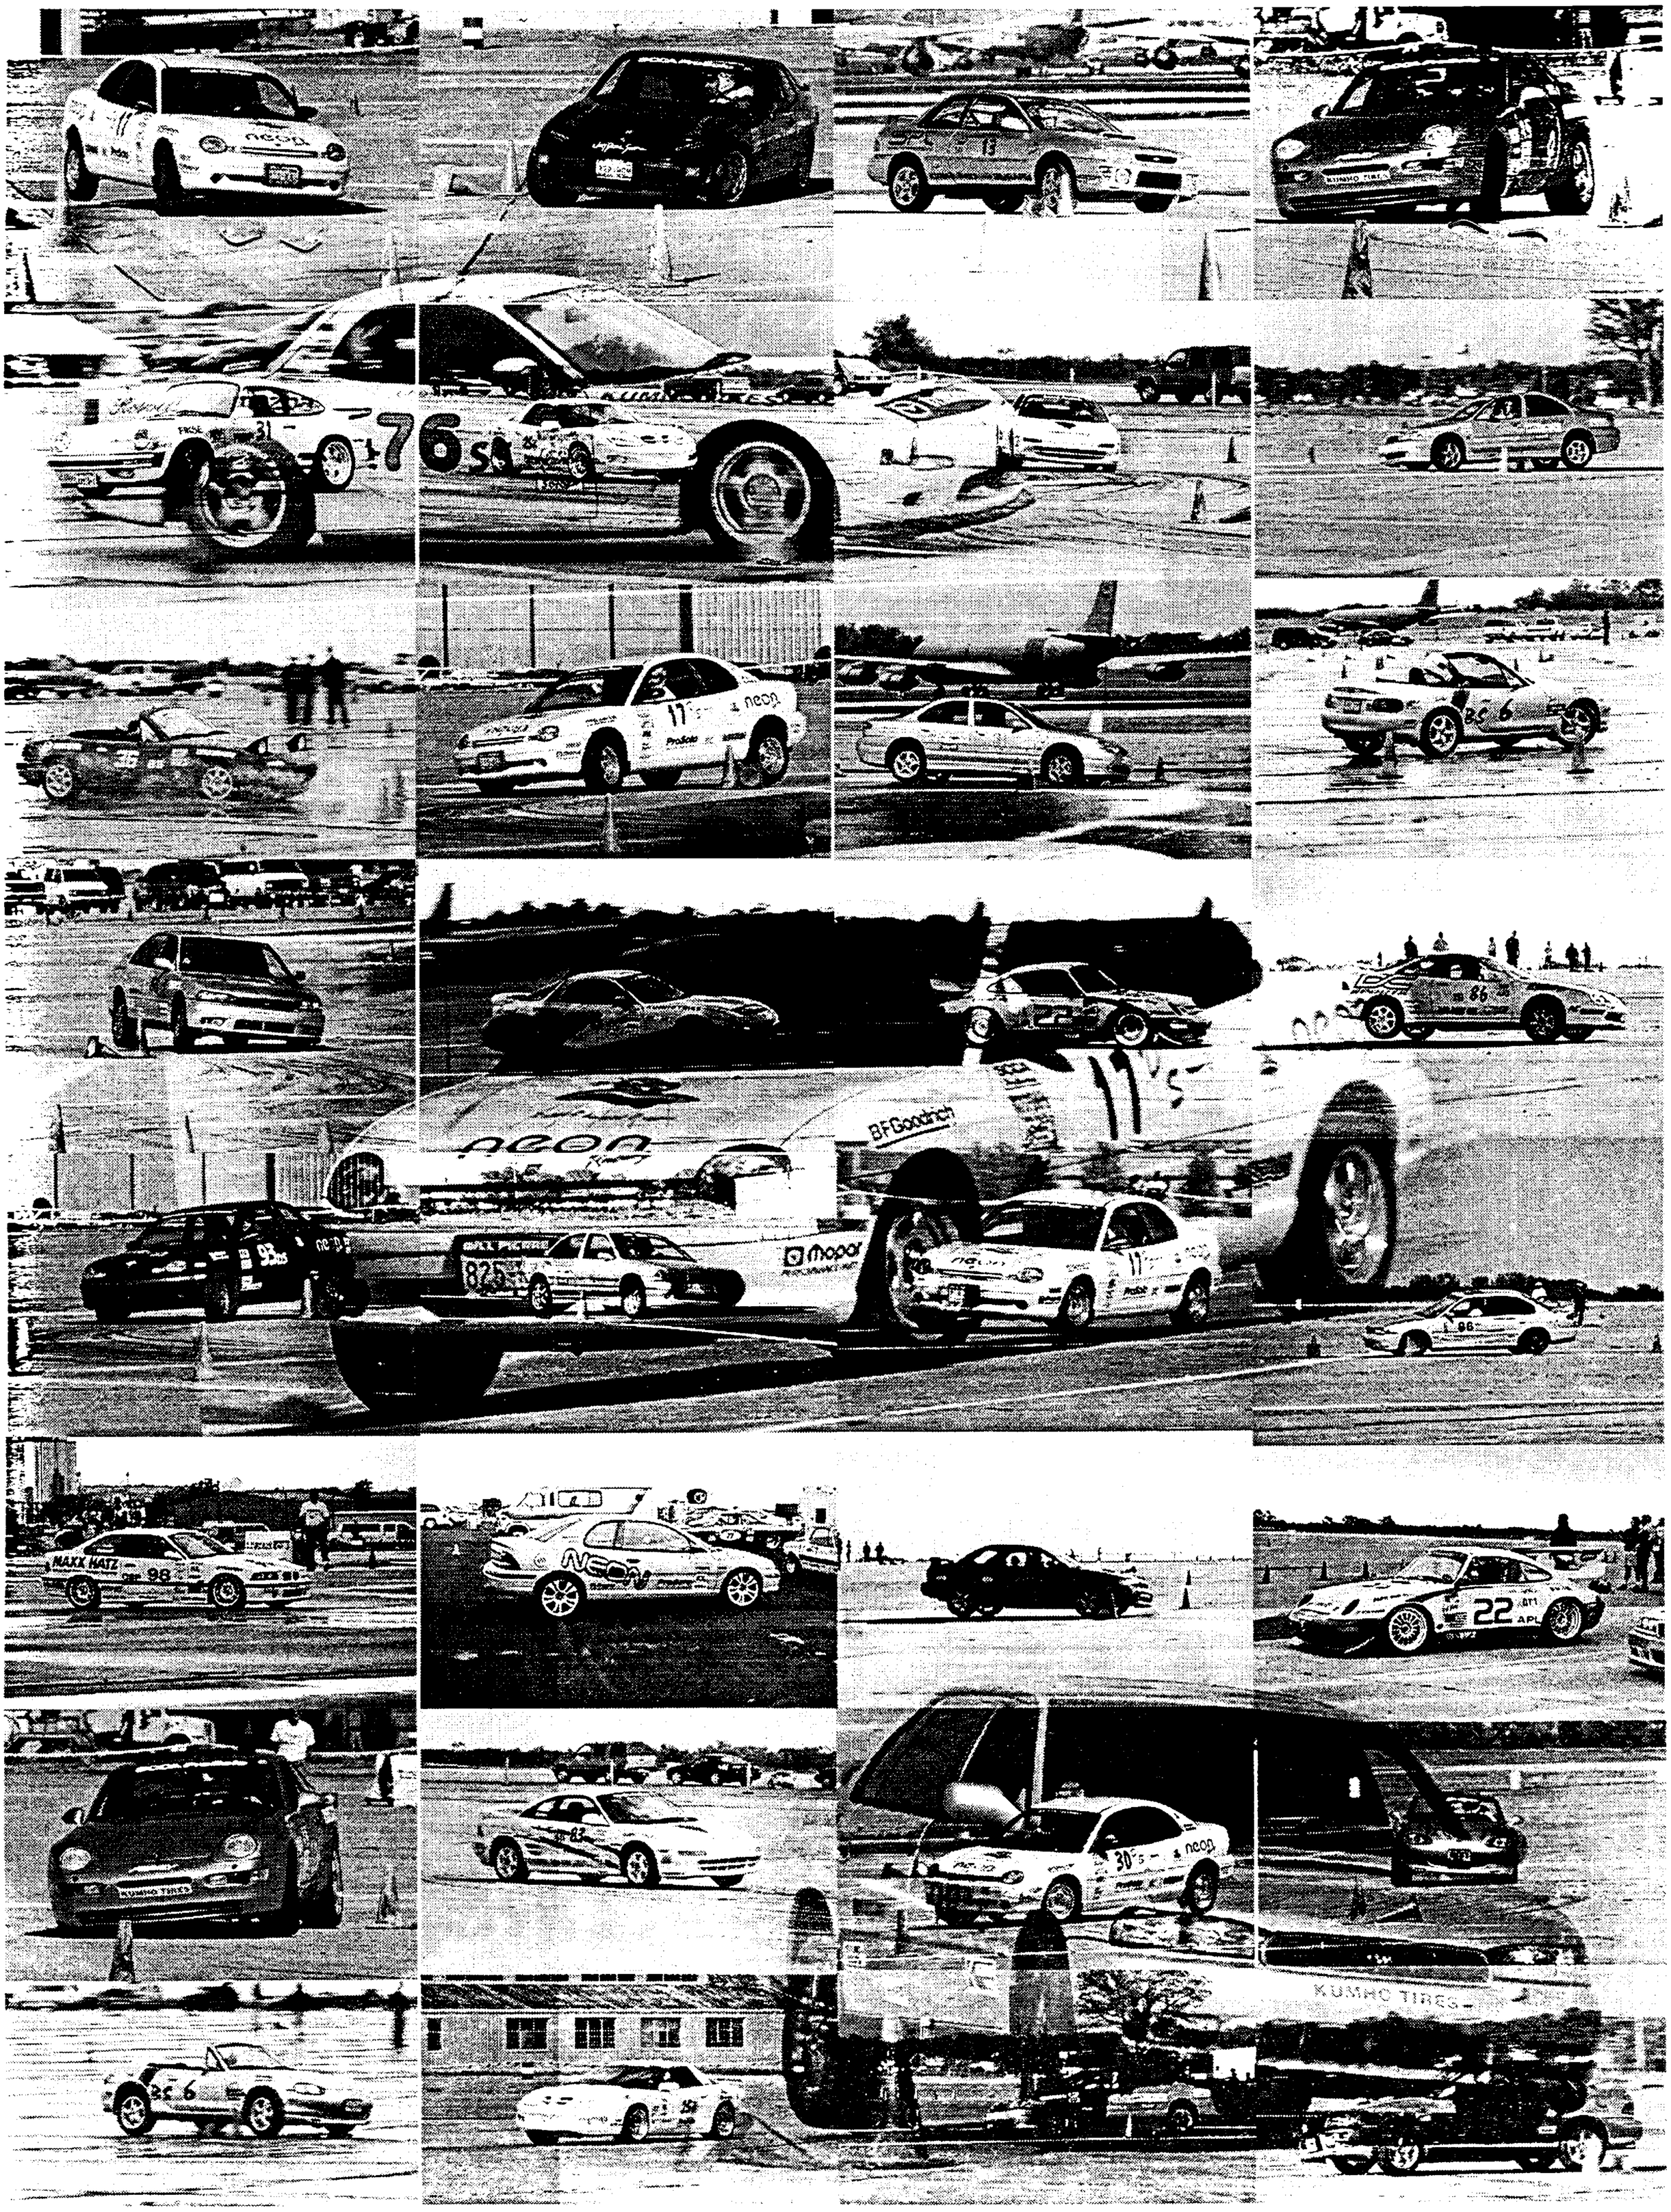

15.1 If the rules do not specifically authorize a modification, it is not permitted.
15.1.A It is not permitted to make any changes, alterations or modifications to any component produced by the manufacturer unless specifically authorized by these rules.
15.2 2nd paragraph – Restrictions regarding external body shape and belly pans are aimed at preventing attempts to obtain ground effects or streamlining.
15.2.B Chassis, frame or subframe may be reinforced, provided components and attachments are not relocated except where specifically permitted. Reinforcing does not authorize the use of belly pans forward of the firewall…

15.2.M ...front spoiler...It shall not protrude ... or aft of the forward-most part of the front fender opening...
15.2.Q Component part of the bodywork, such as hood, fenders and deck lid may be lightened or replaced by ones of alternate materials provided the shape is identical to the original or approved alternate. The approval of alternate body panels does not authorize the use of belly pans forward of the firewall...
15.10.Q.3 Sealing or shrouding the airflow area between the normal grill opening and the water radiator is permitted.

From these rules the Protest Committee determined that the radiator shrouding between the rear of the radiator and the front cross member was a violation of 15.1, 15.1.A and 15.10.Q.3. The non-stock radiator shroud to the rear of the radiator was not authorized by 15.10.Q.3. If the horizontal aluminum plate is considered part of the spoiler, the spoiler is in violation of 15.2.M, as it continues aft of the forward most part of the front fender opening. The fact that the car from the factory is delivered with a plastic part similar to the aluminum plate is immaterial. A stock part is allowed regardless of configuration. A non-stock part per 15.1 and 15.1.A must meet the requirements of the Solo II Prepared Category rules. The aluminum plate as described by the protestee as a re-inforcement for the spoiler and front bodywork violates 15.2.B. The aluminum plate also as part of the spoiler mounting system violated 15.2.Q. Protest upheld. Protestees disqualified. Protest fee returned. Intent to Appeal filed.

Findings of the Appeal Committee:

The Appeals Committee decided to adjust the penalties imposed, as per the Solo II Rules, section 9.4.1.A. The Appeals Committee determined that the undertray in question did not entirely comply with section 15.2.B. The Appeals Committee had inspected the vehicle and protested component, and found that the intent of 15.2.B was not violated. The protested component would not in this case be providing a performance advantage. Drivers Nagler and Shuler were issued reprimands, and were directed to correct the car. Appeal fee returned. (Tunnell and Ankeny abstaining).
